(310) 880-4668

## Coding Skills

---

I've worked with the following technologies:

HTML, CSS, SASS, JavaScript, jQuery, Backbone, AngularJS, Node.js, Java, Servlet API, Google App Engine, Eclipse, Objective-C, Xcode, git, C, GDB, C++, C#, Microsoft Visual Studio, Python, Perl, Ruby, PHP, Vim, LaTeX, Make, Bash, Assembly

I'm best with JavaScript, and I'm a quick learner

## Other Skills

---

I have been slowly learning UI design. This resume itself was a small exercise in responsive design (web version on my GitHub). I would also recommend checking out my startup (see [Entrepreneurship](#)).

I have a strong discrete math background and some leadership experience. I also have a lot of practice talking to customers.

## Education

---

Carnegie Mellon  
School of Computer Science  
Class of 2013

### Majors:

Computer Science, Mathematics

**GPA:** 3.06

Notable Classes:

- 15-410 Operating Systems
- 15-385 Computer Vision
- 15-451 Algorithms
- 21-701 Discrete Mathematics
- 21-484 Graph Theory

## Entrepreneurship

---

(May 2013 – )

- Developed an app which allows customers at restaurants to pay their bills on their smartphones
- Talked extensively with restaurant owners and patrons, adjusting the product based on their feedback
- Ran the app live at a restaurant, adjusting based on customer responses are resulting in metrics 50x better than the competition
- Website: [getthecheck.com](http://getthecheck.com)
- Metrics site: [getthecheck.com/metrics.html](http://getthecheck.com/metrics.html)
- Code: [github.com/Check-Please/cx](https://github.com/Check-Please/cx)

## Microsoft Internship

---

(Summer 2011)

- Worked with the Office Shared Services team
- Build the sign-in screen in Office 365
- Developed a tool for automatic data collection in the back end of Office 365

## Cisco Internship

---

(Summer 2010)

- Worked with the Cisco CRS Multi-Chassis debugging team
- Worked on a website for executing debugging commands, displaying debugging information, and searching a database of bug reports

## Teaching Assistant (part time)

---

(Fall 2010, Fall 2011)

- Taught recitation for two classes (basic 3D calculus and introductory discrete mathematics), held office hours and graded for three classes (the previous two and a class on combinatorics)

## Data Coder - CMU's CASOS (part time)

---

(Fall 2009 – Summer 2010)

- Helped develop software for the analysis of textual social networks
- Worked closely with post-doc Judith Gelernter in the development of her georeferencing algorithm for news articles

## Fluid.js (personal project)

---

(Spring 2014 – )

- A JavaScript MVC designed to be lightweight and similar to Backbone.js in usage, but allow for CSS transitions to be incorporated more easily
- Git Repo: [github.com/sjelin/FluidJS](https://github.com/sjelin/FluidJS)
