Martin Samuel Jelin

sjelin@gmail.com github.com/sjelin (310) 880-4668

Education

Carnegie Mellon School of Computer Science Class of 2013

Maiors:

Computer Science, Mathematics **GPA:** 3.06

Notable Classes:

- 15-410 Operating Systems
- 15-385 Computer Vision
- 15-451 Algorithms
- 21-701 Discrete Mathematics
- 21-484 Graph Theory

Technical Skills

Ranked by experience:

- A HTML/CSS, JavaScript,
 jQuery, Java, C, Bash, git,
 Dynamic Programming, Data
 Structures, Graph Theory
- Python, Ruby, Objective-C,
 Perl, C++, Servlet API, Google
 App Engine, GDB, Number
 Theory
- Backbone, Angular JS,

 Node.js, C#, PHP, Assembly,
 Machine Learning, Computer
 Vision, Cryptography

Other Skills

I have been learning UI design. This resume itself was a small exercise in responsive design (web version on my GitHub). Checking out my startup work for more examples (see **Entrepreneurship**).

I also have a strong discrete math background, plenty of practice talking to customers, and some leadership experience.

Entrepreneurship

(May 2013 —)

- Developed an app which allows customers at restaurants to pay their bills on their smartphones
- Talked extensively with restaurant owners and patrons, adjusting the product based on their feedback
- Ran the app live at a restaurant, adjusting based on customer responses and resulting in metrics 50x better than the competition
- Splash Page: getthecheck.com
- Metrics/Demo: getthecheck.com/info.html
- Code: github.com/Check-Please/cx

Microsoft Internship

(Summer 2011)

- Worked with the Office Shared Services team
- Helped build the sign-in screen in Office 365
- Developed a tool for automatic data collection in the back end of Office 365

Cisco Internship

(Summer 2010)

- Worked with the Cisco CRS Multi-Chassis debugging team
- Worked on a website for executing debugging commands, displaying debugging information, and searching a database of bug reports

Teaching Assistant (part time)

(Fall 2010, Fall 2011)

• Taught recitation for two classes (basic 3D calculus and introductory discrete mathematics), held office hours and graded for three classes (the previous two and a class on combinatorics)

Data Coder - CMU's CASOS (part time)

(Fall 2009 — Summer 2010)

- Helped develop software for the analysis of textual social networks
- Worked closely with post-doc Judith Gelernter in the development of her georeferencing algorithm for news articles

Fluid.js (personal project)

(Spring 2014 —)

- A JavaScript MVC designed to be lightweight and similar to Backbone.js in usage, but allow for CSS transitions to be incorporated more easily
- Git Repo: github.com/sjelin/FluidJS
